

CONSTANTINO

★ ★ ★ FOR NY-21

New York's First Robot-Powered Farming Candidate for Congress.

Farmers across Upstate New York are facing a labor crisis. Workers are harder to find. Costs keep rising.

At Sticker Mule, Anthony replaced his workers with 250 Italian robots. Now he wants to bring that same innovation to NY-21 farms: automation, AI, & efficiency instead of local labor or visa programs.

No shortages. No breaks. No problems. Just efficiency. Anthony Constantino is building the fully automated future of Upstate New York agriculture.
